Professional Experience

02/2026 – current

Frontend/Mobile Platform Engineer (Contract), *Oddball - VA.gov*

- **Own React Native infrastructure and shared tooling** used by feature teams to accelerate delivery on a 508-compliant federal-scale government application.
- **Scoped and implemented home screen redesign**, partnering with Product and Design to clarify requirements, break down tickets, and implement UX.
- **Audited and refactored analytics** instrumentation across the app, eliminating redundant tracking and raising confidence in product metrics.
- **Built reusable components and shared UI patterns** with unit, integration, and e2e coverage, standardizing implementation across feature teams.

11/2024 – 02/2026

Frontend Product/Growth Engineer, *Intuit - Mailchimp*, *Quickbooks*

- **Lead end to end experimentation** for a high velocity growth team, shipping experiments across core user workflows – writing tech specs, scoping tickets, and driving development, QA, and delivery of cross-departmental features.
- **Integrated greenfield generative AI tooling** into email and SMS editing tools and the automations studio.
- **Prototyped and shipped** features spanning automated email/SMS campaign flows, marketing asset management, and CRM dashboards across a platform serving 11M users.

10/2023 – 11/2024

Fullstack Engineer, *Eventbrite*

- **Designed and shipped 10+ A/B tests** on the app's highest-traffic surfaces, improving engagement and conversion.
- **Owned accessibility, Core Web Vitals, and SEO** for the highest-trafficked pages, using Lighthouse, Lumar, and Datadog for continuous monitoring.
- **Key contributor to the ground-up architecture of a greenfield React Native application**, establishing core design patterns, performance optimizations, and automated testing suites for iOS and Android.
- **Led incident investigation and escalation**, coordinating across teams to rapidly diagnose and resolve high-priority production bugs.

02/2022 – 10/2023

Fullstack Engineer, *Bombbomb*

- **Designed, prototyped, and iterated on a product that generated over $1M in sales pipeline**.
- **Contributed to enterprise Oracle to PostgreSQL database migration,** executing schema conversions, rewriting database logic, and establishing robust testing workflows to ensure zero-downtime cutovers.
- **Refactored key classes of a legacy codebase** to reduce redundancy and improve testability, enabling domain-driven design decisions.

08/2021 – 01/2022 **Fullstack Engineer,** *Lodge*

- **Tool Development**: Designed and built an open-source, comprehensive logging framework based on the Elastic stack, a CLI tool to configure deployment, and published it as an NPM package.
- **Automated Deployment**: Automated deployment of ElasticSearch, Logstash, Kibana nodes, and Kafka brokers across multiple availability zones in AWS.
- **Cluster Optimization**: Optimized clusters for fault tolerance and redundancy against traffic spikes and interruption of service

03/2015 – 01/2020 **Animator,** *Pixar Animation Studios*

- Prodigy at Pixar from the age of 19, crafting feature performances for world-renown characters and films.
- Mentor for students and interns, participating in educational outreach for local schools, colleges, and volunteer efforts.
- Analyze video footage for body mechanics, acting, timing, clarity of intent, comedy, drama, thought process, micro expressions, emotion, etc.
